Medical logistics and installation

"Your one Stop Shop for medical equipment, logistics and installations"

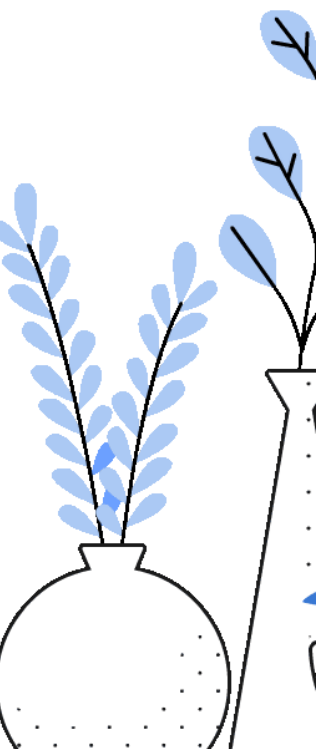

About Us

D&C is the leading Medical Equipment Logistics and Installation Company in Central Africa.

We understand the delicate nature of **medical equipment** and the special “end user requirements” that we will face on site.

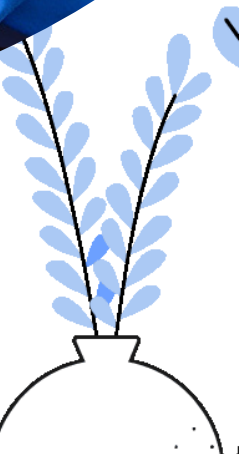

Whether it is in a hospital, or a care home or private workplace, our in-house crew will not only deliver the equipment to the point of use, they can and will prepare sites, assemble and adjust equipment for positioning too.

We have invested extensively in medical logistics and such is reflected through our continuous expansion of our areas of activity and we currently find ourselves as the main logistics and installation partner for the Cameroon's ministry of Public Health, private hospitals and international organisations.

We also serve as Installation partner for many of the world's top medical manufacturers. Including Siemens, GE, Canon, Fujifilms etc.

D&C acts as a one stop shop so we can provide customers with assistance and expert support in every aspect of their delivery commitments.

What We Do

Cameroon-UK-USA

- Medical Equipment Sourcing and Delivery
- Installation, Configuration and Kitting Out
- Loan Pool Management
- Ward Level Delivery
- Healthcare Warehousing
- Healthcare Project Management

Medical Equipment Sourcing and Delivery

We work with global brands to source the right equipment for our clients. We ensure that these equipment are brand new, fit for purpose, manufacturers are fully accredited and all come with warranty.

Our logistics team ensures the safe delivery of these equipment to the right destination

Medical Equipment Installation, Configuration & Kitting Out

But it is not just delivery that we are specialists in.

Assembling hospital beds on site, fixing chambers onto stands using technical equipment, cleaning medical equipment to exacting hygiene standards, and providing medical quality system staging areas are all part of the essential and complimentary services demanded from our teams

07

Loan Pool Management

Tracking loan equipment is a science in itself.

Using our award winning technology, warehousing and transport management software, we work efficiently to manage all equipment.

Back to back moves, handling 'naked' equipment, on site inventories are all tasks that our crews are familiar handling. We can store, pick, pack and distribute your goods across the whole of Cameroon and into Africa in general.

We offer a full suite of inventory management

Ward Level Delivery

We are experienced logistics providers to the healthcare sector and regularly deliver goods to hospital wards and stores.

We understand the pressure placed upon hospital staff and are happy to assist in the placement of goods to a named person so that they can focus on patient care.

We also understand that hospital space is at a premium and will assist by removing unwanted packing where required.

Healthcare Warehousing

D&C are experts in the handling and management of medical goods.

We can store, pick, pack and distribute your goods across the whole of Africa.

We offer a full suite of inventory management solutions, including FIFO/LIFO stock rotation, lot/batch tracking and 'real time' track and trace.

Healthcare Project Management

The success of any logistics project relies on the quality of the project management and D&C has a wealth of experience in this area within Cameroon and Africa at large.

D&C can provide detailed site surveys, method statements and risk assessments to meet your precise needs. We have extensive experience managing local authorities to ensure the project progresses smoothly and where necessary we can organise road closures, heavy lifts, cranes and HIABS.

Reverse Medical Logistics and Disposal

D&C are fully authorized and can provide complete transparency with disposals that meets Environmental Agency approval
